Android 10.0 or later.

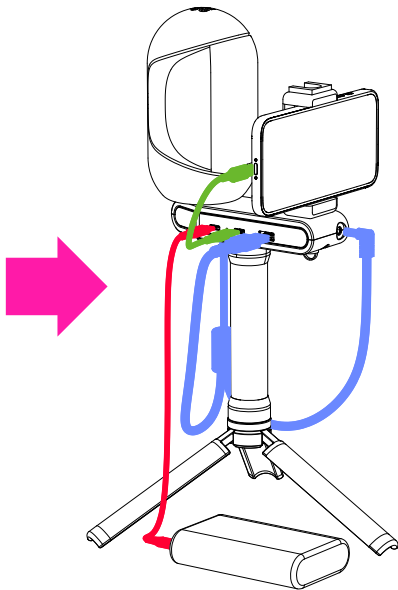

8G running memory or above.

P1

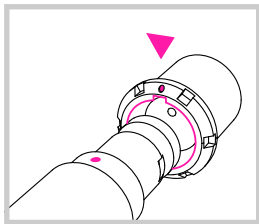

HARDWARE CONNECTION

Connect the 3DMakerpro Connect to the scanner with the device cable; connect it to the phone with the mobile cable; connect it to the power bank with the power cable. In this case, we use Mole(as shown in the pic), and the connection logic applies to all the compatible scanners.

* Device Cable

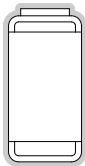

Please make sure the red dot on the plug is lined up with the groove on the device port in case of causing damage to the device. Be sure to plug and unplug the cable in the power-off state.
