

PolyPlus™ PLA

PolyPlus™ PLA is a premium PLA designed for all desktop FDM/FFF 3D printers. It is produced with our patented Jam-Free™ technology that ensures consistent extrusion and prevents jams

Jam Free™

Our patented Jam-Free™ technology dramatically improves the heat stability of our PLA filaments by raising the softening temperature ensuring worry free printing experience.

Colourful

Brighten up your models with a choice of seven vibrant true colours or give them that crystal shine with our four translucent colours. You are bound to find the right one for you.

Safe & Clean

PolyPlus™ PLA is produced exclusively using NatureWorks' Ingeo™ PLA resin. Unlike some filaments on the market our PolyPlus™ PLA does not release hazardous odors.
